

Maintenance Standing Box

HARD

HARD9201 - Maintenance Standing Box

The HARD9201's primary design objective was to create a solid and tunable substrate to perform the simple task of steadily supporting a model car. In keeping with H.A.R.D tradition it is also flexible in scope to accomodate larger cars and be multifunction device if possible, hence why not integrate a storage box into the design and then improve on it some more.

It would not be the first tool box used as a car stand, it's evident at any race meeting and many racers find themselves using one at one time or another. What makes the HARD9201 special is the attention to detail, the dual purpose design addresses the key elements of sorting and selecting a variety of components and providing a sturdy base to function as a chassis support for suspended servicing. Each function has been designed with practicality in mind, to enhance and improve the experience of using a HARD9201.

Firmly sealed and closed, it is unlikely to remain idle. The special sponge pads and the sturdy base of the HARD9201 invites all types of chassis. Compact modular storage is a modern lifestyle necessity, doubled up and twice the storage, having an extra HARD9201 is a logical choice, the more modules you have, the better it is.

Features:

- 14.8 x 12.4 x 2.2cm
- Lightweight and compact
- Modular design / stackable
- Multi-function / dual purpose
- Special sponge pads for chassis grip
- Two fixed segments and four extra mod
- Rigid and sturdy, made with resilient PP
- Ramped segments for easy piece selection

perfectly fix your cars standing in three ways

Four extra partitions make the differences
